Adjustment

Glass Adjustment

- · Check the glass run channel for damage or deterioration, and replace them necessary.
- 1. Remove the rear door trim.
- 2. Remove the rear door trim seal.
- 3. Carefully move the glass (A) until you can see the glass mounting bolt, then loosen them.

ه دیجیتال تعمیرکاران خودرو در ایران

Door Striker Adjustment

Make sure the door latches securely without slamming it. If necessary adjust the striker (A): The striker nuts are fixed. The striker can be adjusted up or down, and in or out.

1. Loosen the screws (B) just enough for the striker to move.

Tightening torque:

(B):16.7 ~ 21.6 N.m (1.7 ~ 2.2 kgf.m, 12.3 ~ 15.9 lb-ft)

- 2. Tap on the striker with a plastic hammer to adjust the striker. The striker will not move much, but will give some adjustment.
- 3. Hold the outer handle out, and push the door against the body to be sure the striker allows a flush fit. If the door latches properly, tighten the screws and recheck.

Body (Interior and Exterior)

Door Position Adjustment

- After installing the door, check for a flush fit with the Body, then check for equal gaps between the front, rear, and bottom, door edges and the body. Check that the door and body edges are parallel. before adjusting, replace the mounting bolts.
- 1. Check that the door and body edges are parallel.

SSLBD1080D

2. Place the vehicle on a firm, level surface when adjusting the doors.

اولين سام

Exterior

- 3. Adjust at the hinges (A):
 - Loosen the door mounting bolts slightly, and move the door in or out until it aligns flush with the body.
 - Loosen the hinge mounting bolts slightly, and move the door backward or forward, up or down as necessary to equalize the gaps.
 - Place a shop towel on the jack to prevent damage to the door when adjusting the door.

Tightening torque :

(B): 21.6 ~ 26.5 N.m (2.2 ~ 2.7 kgf.m, 15.9 ~ 19.5 lb-ft) (C): 34.3 ~ 41.2 N.m (3.5 ~ 4.2 kgf.m, 25.3 ~ 30.4 lb-ft)

SSLBD1081D

- 4. Grease the pivot portions of the hinges indicated.
- 5. Check for water leaks.

- 17. Scrape or wipe the excess adhesive off with a putty knife or towel. To remove adhesive from a painted surface or the windshield, wipe with a soft shop towel dampened with alcohol.
- 18. Let the adhesive dry for at least one hour, then spray water over the roof and check for leaks. If a leak occurs, let it dry, then seal with sealant :
 - Let the vehicle stand for at least four hours after windshield installation. If the vehicle must be driven within 4 hours, it must be driven slowly.
 - Keep the windshield dry for the first hour after installation.
- 19. Reinstall all remaining removed parts. Install the rearview mirror after the adhesive has dried thoroughly. Advise the customer not to do the following things for two the three days :
 - Slam the door with all the windows rolled up.
 - Twist the body excessively (such as when going in and out of driveways at an angle or driving over rough, uneven roads).
- 20. Installation the following items
 - Wind deflector
 - Roof antenna
 - (Refer to the BE group "Audio")
 - Roof trim

(Refer to the BD group - "Roof Trim")

Interior trim

(Refer to the BD group - "Interior Trim")

- Rear seat (Refer to the BD group - "Rear Seat")
- Front seat (Refer to the BD group - "Front Seat")

Adjustment

Inspect Glass Alignment

- 1. Check for abnormal noise or bending during operation.
- 2. With the sunroof fully closed, check for water leakage.
- The roof panel (B) should be even with the movable glass (A) weatherstrip, to within the standard value "E" all the way around. If not, make the following adjustment.

Tightening torque :

Standard value "E" [mm(in.)]

- (1) Front edge : 1.2mm (0.0472 in)
- (2) Rear edge : 1.0mm (0.0394 in)

BD-60

4. If the position is not as specified, lightly loosen the glass adjusting screws (A) to adjust the glass height and tighten it.

• Do not damage the screws.

How To Initialize Motor

Whenever the battery is disconnected, discharged or the related fuse is replaced or reinstalled, the panoramaroof system must be reset according to the procedure below.

- 1. Turn the ignition key to the ON position and then close the panoramaroof completely.
- 2. Release the panoramaroof control levering the switch.
- 3. Press and hold the CLOSE button for more than 10 seconds until the sunroof has moved slightly.
- 4. Release the panoramaroof control lever.
- 5. Press and hold the CLOSE button once again until the sunroof do as follows.
 - Tilt \rightarrow Slide Open \rightarrow Slide Close
 - Then, release the lever.
- 6. Reset procedure of panorama system is finished.

When To Initialize The Motor

- 1. At the time of manufacture.
- 2. If the Initial setting is erased due to loss of power.
- 3. After using the manual handle.

Body (Interior and Exterior)

Operating The Panoramaroof Emergency Handle

- 1. Use the panoramaroof emergency handle to close and open the panoramaroof manually for the following case only.
 - To close the panoramaroof before driving a vehicle in arainy day or on the highway if the panoramaroof can not be closed due to failure of the panoramaroof motor or controller.
- 2. Operating method.
 - Remove the roof trim
 - Push the emergency handle up into the hexagonal drive of the panoramaroof motor. You must push hard enough to disengage the motor clutch; otherwise the emergency handle will slip due to incomplete fit in the motor.
 - Carefully turn the emergency handle clockwise to close the panoramaroof.
 - After closing the sunroof, wiggle the handle back and forth as you remove the tool from the motor, to ensure the motor clutch reengages.
 - A 5mm hex socket may be used in place of the emergency handle, with a" Speeder" type handle.

- Do not use power tools to operate the panoramaroof.
- Damaged to the components may occur.

BD-103

Installation

- 1. With a knife, scrape the old adhesive smooth to a thickness of about 2mm (0.08 in.) on the bonding surface around the entire windshield opening flange:
 - Do not scrape down to the painted surface of the body; damaged paint will interfere with proper bonding.
 - Remove the rubber dam and fastereners from the body.
 - Mask off surrounding surfaces before painting
- 2. Clean the bonding surface with a sponge dampened in alcohol. After cleaning, keep oil, grease and water from getting on the clean surface.
- 3. Install the windshield side molding (A) and fasteners. Do not allow any gaps.
 - القالم مال خودرو سامانه می خودرو در ایران دیجیتال تعمیر کارل خودرو در ایران

4. Install the spacer (A) install the windshield glass (B)

temporarily with marking sure to position them on the

- 5. With a sponge, apply a light coat of body primer to the original adhesive remaining around the windshield opening flange. Let the body primer dry for at least 10 minutes.
 - Do not apply glass primer to the body, and be careful not to mix up glass and body primer sponges.
 - Never touch the primed surfaces with your hands.
 - Mask off the dashboard before painting the flange.

'//////// : Primer

ASIE070G

Apply a light coat of glass primer to the outside of the fasteners.

UNOTICE

- Never touch the primed surface with your hand If you do, the adhesive may not bond to the glass properly, causing a leak after the windshield glass is installed.
- Do not apply body primer to the glass.
- Keep water, dust, and abrasive materials away from the primer.

//////// : Primer

SBHBD8203L

SSLBD1171D

WWW.DIGITALKHODRO.COM

021 62 99 92 92

BD-104

7. Pack adhesive into the cartridge without air pockets to ensure continuous delivery. Put the cartridge in a caulking gun, and run a bead of adhesive (B) around the edge of the windshield (A) between the fastener and molding as shown. Apply the adhesive within 30 minutes after applying the glass primer.

8. Use suction cups (A) to hold the windshield (B) over the opening, align it with the alignment marks (C) made in step 15, and set it down on the adhesive. Lightly push on the windshield until its edges are fully seated on the adhesive all the way around. Do not open or close the doors until the adhesive is dry.

ASIE070J

Body (Interior and Exterior)

- Scrape or wipe the excess adhesive off with a putty knife or towel. To remove adhesive from a painted surface or the windshield, wipe with a soft shop towel dampened with alcohol.
- 10. Let the adhesive dry for at least one hour, then spray water over the windshield and check for leaks. Make leaking areas, and let the windshield dry, then seal with sealant:
 - Let the vehicle stand for at least four hours after windshield installation. If the vehicle has to be used within the first four, it must be driven slowly.
 - Keep the windshield dry for the first hour after installation.
- 11. Reinstall all remaining removed parts. Install the rearview mirror after the adhesive has dried thoroughly. Advise the customer not to do the following things for two the three days:
 - Slam the door with all the windows rolled up.
 - Twist the body excessively (such as when going in and out of driveways at an angle or driving over rough, uneven roads)
- 12. Installation the following items.
 - Windshield glass deicer connector
 - (Refer to the BE group "Windshield Deicer")
 - Cowl top cover
