

Turn Signal and Hazard Warning Light

The diagram illustrates the electrical system for the right-hand side of the vehicle, focusing on the mirror and lighting components. Key elements include:

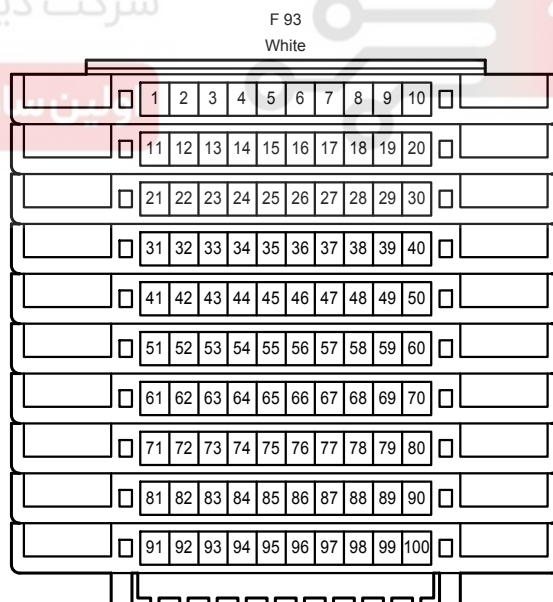

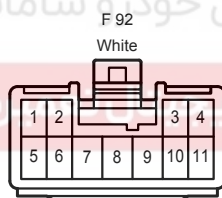

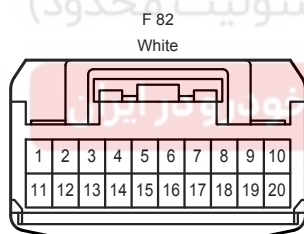

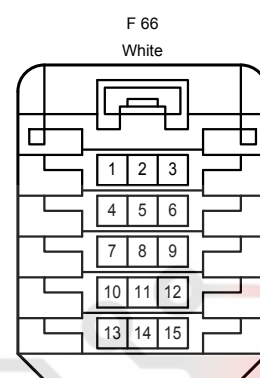

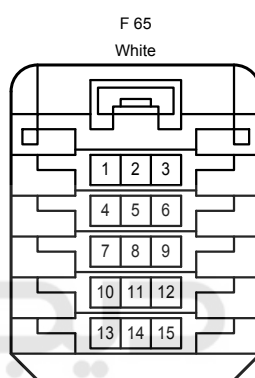

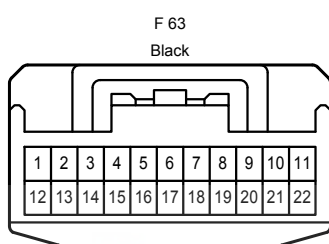

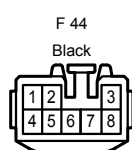

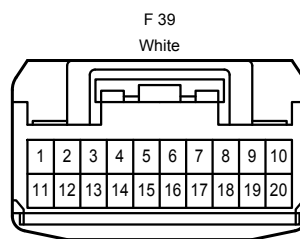

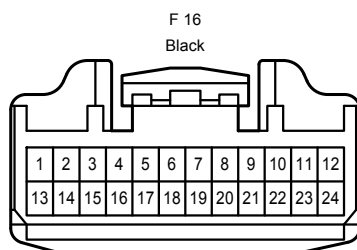

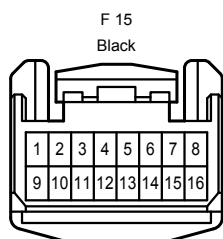

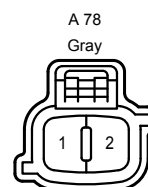

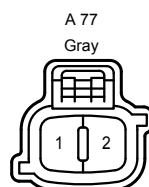

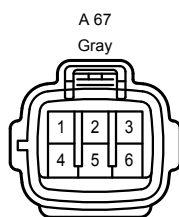

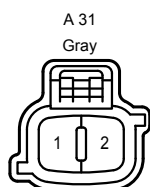

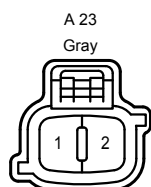

- Power Source:** A pink line labeled 'P' represents the main power supply, which branches into several circuits.
- Outer Rear View Mirror Assembly RH (z3(B)):** This assembly is connected to the power supply via a junction connector (P39(A), P40(B)). It includes a 'Turn' switch and a relay (IF1).
- Outer Mirror Control ECU Assembly RH (I4(A), z3(B)):** This ECU is connected to the mirror assembly and the power supply. It has terminals for TRN+, TRN-, and TRNI.
- Rear Combination Light Assembly RH (P25):** This assembly is connected to the power supply via a junction connector (P38). It includes a 'Turn' switch and a relay (IF1).
- Headlight Assembly RH (A31(A), A77(B)):** This assembly is connected to the power supply via a junction connector (A67). It includes a 'Turn' switch and a relay (IF1).
- Grounding:** The system is grounded to the vehicle's chassis (G) and the battery (P3).
- Wiring Colors:** The diagram uses color-coded wires: yellow for the mirror assembly, green for the ECU, blue for the rear light, and purple for the headlight.
